---

## Professional Summary

- **Resourceful and impact-driven Software Engineer** with 1+ years of experience building scalable backend systems in high-demand environments.
  - **Proficient in Python and Java**, with strong knowledge of algorithms, GitHub workflows, and Agile development methodologies.
  - **Led data-focused team projects** during a post-grad diploma in Data Analytics, including work on data pipelines, APIs, and performance monitoring.
  - **I am passionate about open-source tools**, developer productivity, and improving product quality through automation and efficiency.
  - **Actively seeking a Fall 2025 internship** to contribute across the full software development lifecycle — from ideation to deployment.
- 

## Technical Proficiencies

- **Languages:** Java, Python, C
  - **Frameworks/Technologies:** Spring Boot, Spring Cloud, Hibernate, JPA, Spring Web MVC, Jackson, JMS
  - **Databases:** PostgreSQL, Oracle
  - **Cloud/DevOps:** Docker, Git, GitHub, Maven, Azure Pipelines
  - **Security & Testing:** Checkmarx, JUnit
  - **Other:** Agile, REST APIs, CI/CD, Clean Code Principles, Linux terminal ops
  - Strong communication across cross-functional teams
  - Receptive to constructive feedback and self-driven improvement
  - Proactive and resilient problem-solver
  - Comfortable working under pressure in fast-paced environments
  - Team-oriented with a passion for collaboration and innovation
- 

## Education

**St. Clair College**, Windsor, ON | Jan 2024 – Apr 2025  
*Post Graduate Diploma – Data Analytics for Business*

- Relevant Coursework: Data Visualization, Statistical Analysis, Machine Learning, AWS, Business Intelligence
- 

## Professional Experience

**Systems Engineer – Infosys Consulting Services**  
Chennai, India

*Jul 2022 – Aug 2023*

- Engineered scalable backend systems using Java/Spring Boot for the Export Development Bank of Egypt (EDBE), driving customer success across mobile/web/ATM touchpoints.
- Developed 10+ high-throughput RESTful APIs powering 5M+ monthly user interactions.
- Optimized SQL database performance (Oracle, PostgreSQL), enhancing transaction speed by 30%
- Strengthened API security through token-based auth and encryption, aligning with fintech-grade compliance standards
- Led backend optimization sprints to identify bottlenecks, reducing latency and MTTR while boosting infrastructure efficiency. Actively contributed to architectural planning, CI/CD pipelines, and monitoring systems to support rapid iteration cycles.
- Collaborated with cross-functional teams in Agile sprints and code reviews, promoting continuous improvement and team cohesion
